Education

Jaypee University of Engineering and Technology, Guna — Expected Graduation 2027

*Bachelor of Technology in Computer Science and Engineering (CGPA: **8.05**)*

Experience

GetBismart |Frontend Developer | Irvine, CA| Remote — Apr 2025 – Aug 2025

- Developed secure subscription and payment flows using Stripe APIs and **GraphQL** (resolvers & mutations), deploying the full-stack application with **Docker** and **CI/CD**; reduced transaction failures by **30%** through webhook validation and retry handling.

Bluephant | Backend Dev | Bengaluru | Remote — June 2025 – July 2025

- Built and optimized Node.js/Express APIs with MongoDB, reducing average response time by 40% via aggregation **pipelines and indexing**.

Symbiosis Institute Of Technology| Summer Research Intern | Hyderabad | Remote — May 2025 – July 2025

- Conducted research and authored a paper, also explored lightweight code execution models.
- Established it into a full-stack competitive coding platform with C++, Java, and Python support, processing **10k+** code submissions.

CodifyNow | Full Stack Dev | Bengaluru | Remote — Sept 2024 – Dec 2024

- Engineered a scalable backend for an anonymous real-time chat application with WebSockets, implementing a **hashmap-based architecture** to efficiently manage over **1,000 concurrent users**.

Skills

- **Full-Stack & Backend Development**: React.js, Node.js, Express.js, MongoDB, REST APIs, FastAPI, Socket.IO
- **DevOps, Tools & Languages:** Git, Docker, CI/CD, AWS, Kubernetes, JavaScript, TypeScript, C, C++, Python

Projects

JudgeLib | *Node.js, Express.js* — Github | Live

- Designed and published a lightweight Judge0-inspired code execution engine (C++, Java, Python) as a custom npm library with a dedicated microservice, reaching **1,000+ downloads** in a year.
- Built a scalable queuing system using Kubernetes and KEDA, enabling efficient code execution at scale, capable of handling **50k+** test cases and evaluating them in few seconds.

Smart Classroom Management System (EduSync) | Node.js, Express.js, MongoDB, Socket.IO — Github | Live

- Spearheaded EduSync, a web platform enabling live meetings, assignment handling, attendance tracking, and interactive **whiteboard** teaching for educators and students.
- Integrated **Socket.IO** and **Stream SDK** for real-time communication,including group chats and AI-powered chatbots.

Leadership & Achievements

- Won a team to **1st place** at Ideathon (Mar 2025) by guiding concept-to-pitch development of a real-world tech solution recognized for originality and feasibility.
- Led team to **1st Runner-Up**, Hacksagon Hackathon, IIITM Gwalior, July 2025.
- Secured **2nd** place in Codeathon out of **200+ participants** by solving complex algorithmic challenges under time constraints (Aug 2024).
- Finalist in SBI CYI at IIT Delhi, selected from 2000+ teams; secured 4th rank in the Challengers Round among 150+ teams.
